

JAN 29 1999

BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY

Course Outline **Part A**

School of Health Sciences

Program: Nursing

Option:

NURS 1020**Clinical Techniques 1 — Laboratory**

Hours/Week:	3	Total Hours:	51	Term/Level:	1
Lecture:	1	Total Weeks:	17	Credits:	3.5
Lab:	2				
Other:					

Prerequisites

None

NURS 1020 is a Prerequisite for:

Course No.	Course Name
NURS 2020	Clinical Techniques 2 — Laboratory
NURS 2030	Nursing Practicum 2

Course Goals

Clinical Techniques 1 — Laboratory facilitates student learning of particular hands-on nursing skills used in professional nursing practice.

Course Description

This course presents basic nursing skills related to hygiene, touch therapies and therapeutic touch, movement and rest, feeding, oxygen use, voiding, bowel care, and oral and topical medications. **Emphasis** is placed on student understanding of the purpose of the skill, focused assessment related to the skill, as well as the safe and confident performance of the skill. The communication and research aspects of the skills are also included. Student independent and laboratory practice, demonstrations and examinations are part of the course.

Process threads relevant to this content:

- **Leadership** — decision making, risk management, priority setting.
- **Communication** — giving information to people — what helps, what hinders? Developmental considerations, using a focused assessment relevant to the skill, identifying vocabulary related to the skill.
- **Systematic inquiry** — the research process — posing questions, sources of data, reliability, generalizability, etc. Using written sources — textbooks, hospital policy manuals, research articles. Using questioning and modeling to develop thinking and reflection during the lab session.
- **Professionalism** — keeping standards of practice and ethics in mind for all skills.
- **Learning** — focus on individual responsibility related to how skills are learned, practiced and demonstrated etc.

Evaluation

Multiple choice exam	50%
Skill demonstration	30%
Research activity	20%
TOTAL	100%

(Mid Term & Finals; must pass the final exam.)

All evaluation strategies must be completed to pass this course. Skill testing must be satisfactory to pass this course.

Course Outcomes and Sub-Outcomes

The student will:

1. describe the safety principles for all hands-on nursing skills.
2. describe the purpose of the skills to the human being.
3. demonstrate selected skills safely and confidently.
4. appreciate the research base of selected skills.
5. demonstrate the communication aspects of hands-on nursing skills.
6. demonstrate responsibility for attaining and maintaining a safe level of skill performance.
7. recognize the real and potential risks of skills to people.

NURS 1020

Clinical Techniques 1 — Laboratory

Effective Date

August 17, 1998

Instructor(s)

Kay Negoro

Office No.: SE12 418

Phone: 451-6953

Office Hrs.: See posted hours at desk

Text(s) and Equipment

Required:

Snyder, M. (1992). *Independent nursing interventions*. (2nd ed.). Albany, New York: Delmar.

Choose between one of the following texts.

Dugas, B.W. & Knor, E.R. (1995). *Nursing foundations: A Canadian perspective*. Scarborough, ON: Appleton & Lange, Canada.

Kerr, Sirotnik, (1997). *Canadian Fundamentals of Nursing*, Potter and Perry, Mosby, Toronto.

Optional: Math for Meds

Course Notes (Policies and Procedures)

1. Course delivery and evaluation methods will be discussed during the first week of the class.
2. Selected clinical techniques will be self-taught with testing during laboratory periods. Other techniques will be practiced during laboratory periods and tested at specific times on the class schedule. These are noted on the class schedule.
3. A study guide for class reading and preparation will be distributed with this course outline.
4. Unforeseeable circumstances may necessitate the alteration of course content, sequencing, timing or evaluation. As much as possible, students will be given adequate notice of such changes.

Participation/Attendance

1. Regular attendance in lecture, seminars and laboratory periods is required of all students. If a student is absent **for any cause other than illness** for more than ten percent (10%) of the time prescribed for any subject, he/she may be prohibited from completing the course (4.07.10 BCIT Policy Manual).
2. If a lecture and/or laboratory period is missed, the student is responsible for the content of the class. The skill must be learned and practiced **prior** to performing the technique in the clinical area. **The student must discuss with the course instructor how he or she plans to learn this content.** This must be completed within a week. You will be expected to perform this skill in the clinical area ASAP. Your clinical instructor will be notified about your plan.

Course Notes (Policies and Procedures) (cont'd.)

Evaluation of Clinical Technique: Final Exam (See page 2 of this course outline for the marks distribution.)

The final skill testing exam of clinical techniques is worth 30% of your final grade. **You must pass this component of the evaluation process to pass the course.** Your demonstration of specific techniques will be graded satisfactory/unsatisfactory according to criteria on a checklist which you will have seen prior to the test in practice labs. If you meet all criteria you will receive a satisfactory and be granted 30 marks (30%). If you do not meet all criteria you will receive an unsatisfactory and no numerical grade will be given (0%). You will be given the opportunity to redo a techniques demonstration exam **once** should you receive an unsatisfactory. For all techniques demonstration tests you will be asked to perform the technique as well as answer questions about the particular technique being demonstrated.

You must achieve a passing grade (50%) on the final multiple choice exam to pass this course.

Assignment Details and Evaluation Methods (Research Activity)

Assignment Details

Identify a clinical technique or related issue to a clinical technique taught in Level 1. Investigate current knowledge, thinking and research significant to this technique or related issue. Conduct your investigation by:

- reviewing current research literature.
- comparing nursing textbook information with research reported in nursing journals.
- reviewing appropriate hospital documents, e.g., policy and procedure manuals.
- reviewing RNABC discussion papers.
- interviewing a practicing nurse and/or client.

By following these steps you should be able to locate a research article related to your topic of interest.

You might begin this process of inquiry by asking a question such as: "Does a back rub before bedtime promote relaxation and consequently induce sleep?"

Expectations and Evaluation Methods

Once you have chosen a research article, you are ready to go on to the following.

1. You are to analyze the research article by looking at the critical components essential to a research study. These criterias will be discussed in class.
2. You are to convey your research findings to your classmates in a **poster** presentation format. It must meet the recommended criterias for a poster presentation.
3. You **must** submit a reference list. All printed and oral (interviewee) sources of information must be acknowledged and included in your reference list by the assignment deadline.
4. A class day will be scheduled for students to present and share information about the research topic. Faculty and students from the other levels will be invited to attend.
5. This research assignment is worth 20% of your final grade.
6. The grading of this assignment will be the responsibility of you and your clinical techniques instructors.

Assignment Details and Evaluation Methods (Research Activity) (cont'd.)

Evaluation of Research Assignment

1. You will work in groups of 4 students (quads) to complete this assignment.
2. Marks are assigned based on three criterias and the self-reported work of each individual. Therefore, each person in the quad receives his/her own mark.
3. Your clinical techniques instructors will grade the assignment. The distribution of marks is outlined for you.

A. **Content** (10 marks)

Content presented should reflect the thinking of a beginning researcher. The thinking shows familiarity with the research process. A question or problem is clearly identified and is relevant to Nursing practice. It should describe the sample studied, the method and tools used and a data analysis. A summary and conclusion should be clearly stated. Implications of research findings for nursing practice are identified and discussed. Ideas for further research are identified.

B. **Organization** (5 marks)

The research study must relate to the skills you have learned in this course. Information is presented in a logical and orderly manner. A systematic approach to gathering evidence is evident. Language used is clear and precise, condensed and is free of jargon, vagueness and ambiguity. Research nursing and medical terms are defined for the audience (Level 1 Nursing students). Sources of information are acknowledged and a typed bibliography is handed in. APA style of referencing is utilized. *A reference list must be submitted along with a copy of the research paper.*

C. **Creativity** (5 marks)

Creativity refers to the visual impact the poster illicit. The research findings should be presented in an interesting, stimulating and thought provoking manner. Look at the sample posters in 418 to get an idea of some of the possibilities.

4. Students may request one review of their assignment mark. This may involve a meeting with the instructors and students involved in the assignment.

Schedule

NURS 1020

Clinical Techniques 1 — Laboratory

Week of/ Number	Outcome/Material Covered	Reference/Reading	Assignment	Due Date
Aug. 20/98 Week 1	<p>Introduction to Clinical Techniques 1</p> <ul style="list-style-type: none"> • Overview of course content and relevant process threads • Discussion of course delivery methods • Discussion of course requirement and evaluation methods <p>Principles that apply to Level 1 Clinical Techniques: e.g.,</p> <ul style="list-style-type: none"> • medical asepsis • body substance precautions • body mechanics • conservation of energy and time • comfort • safety 	<p>Clinical Techniques Course Outline</p> <p>Back Talk – WCB publication (on reference shelf)</p> <p>Fundamentals of Nursing text</p> <p>* See study guide for specific reading and class preparation</p> <p>BSP videotape will be shown in lab</p>		

Please note that all skills that are “asterisked” must be self-taught. This can be done by viewing the skills video in the library and by practicing in the lab. You are expected to demonstrate competency of this skill to the lab instructors in the scheduled time.

Week of/ Number	Outcome/Material Covered	Reference/Reading	Assignment	Due Date
Aug. 27/98 Week 2	<p>Clinical Techniques related to Integumentary System</p> <ul style="list-style-type: none"> • bed bath (complete and partial) (video will be shown in class) • occupied bed* • perineal care <p>* Techniques are self-taught with return demonstration during the lab.</p>	<p>Fundamentals of Nursing text</p> <p>* See study guide for specific reading and class preparation</p> <p>Snyder, M. (1992). Independent Nursing Interventions (2nd ed.). Albany, New York: Delmar, pp. 199–205</p>		
Sept. 3/98 Week 3	<p>Clinical Techniques related to nutrition and EENT/face/head and neck</p> <ul style="list-style-type: none"> • mouth care* (routine and special mouth care) • denture care (demo) • feeding • touch therapy, e.g., back massage (video will be shown in the lab) <p>* Clinical Technique will be self-taught with return demonstration during the lab</p>	<p>Fundamentals of Nursing text</p> <p>* See study guide for specific reading and class preparation</p>		
Sept. 10/98 Week 4	<p>Clinical Techniques related to Musculoskeletal System</p> <ul style="list-style-type: none"> • ROM* • positioning (video will be shown in class) • discussion of the Hazards of Immobility (view tape before lab) <p>* Clinical Techniques are self-taught with return demonstration in lab.</p>	<p>Fundamental of Nursing text</p> <p>* See study guide for specific reading and class preparation</p>		

Week of/ Number	Outcome/Material Covered	Reference/Reading	Assignment	Due Date
Sept. 17/98 Week 5	Clinical Techniques Assessment Course: Testing Day 0930–1020 – Multiple choice exam 1030–1230 { Assessment skill performance testing 1330–1630 {	No 1020 this week. Assessment cause testing		
Sept. 24/98 Week 6	Clinical Techniques related to Musculoskeletal System • lifts and transfers } Demo • crutch walking } & • walking and assertive devices } Practice • restraints	Fundamentals of Nursing text * See study guide for specific reading and class preparation		
Oct. 1/98 Week 7	Midterm Multiple Choice Exam (1 hour) Skill testing <i>practice exam</i> (2 techniques) You will select one technique you wish to be tested on. A second technique from a hat will be drawn from a hat when you come to the test.		prepare for exam	Oct. 1, 98
Oct. 8/98 Week 8	Clinical Techniques related to Anorectal System • bowel care (demo) • discussion “What research questions might there be related to the use of bowel interventions such as enemas?” • find out what bowel routine protocol is practiced in your clinical area • practice math tests for calculations of medications	Fundamental of Nursing text (chapter on Research in Nursing)		

Week of/ Number	Outcome/Material Covered	Reference/Reading	Assignment	Due Date
Oct. 15/98 Week 9	Oral and Topical Medications (demo and practice) <ul style="list-style-type: none">• safety principles associated with medication administration• math for meds• pharmacology• legal aspects of drug administration• bring drug handbook to class• must prep the medication situation given to you prior to this lab. Research all drugs to be administered.	Fundamental of Nursing text Any recommended Math for Meds or Calculations text * See study guide for specific reading and class preparation		
Oct. 22/98 Week 10	Clinical Techniques related to Genitourinary System <ul style="list-style-type: none">• measures to increase voiding*• intake and output*• bedpans and urinals• incontinent briefs <div><div></div><div>Situation given prior to this lab will be tested.</div></div> <div><div></div><div>Demo & Practice</div></div> * The above content will be tested in lab.	Fundamentals of Nursing text * See study guide for specific reading and class preparation Bring urine sample to lab		
Oct. 29/98 Week 11	Clinical Techniques related to Genitourinary System, cont'd. <ul style="list-style-type: none">• catheter and condom drainage• urine testing• collection of unsterile specimen	* See study guide for specific reading and class preparation		
Nov 5/98 Week 12	Research Process <ul style="list-style-type: none">• Discussion of the research assignment• Why research in nursing practice?• How to get started?• Posing research questions• Sources of information• What's relevant? * Bring a research article related to a skill to the practice lab.	Fundamental of Nursing text		

Week of/ Number	Outcome/Material Covered	Reference/Reading	Assignment	Due Date
Nov. 12/ 98 Week 13	Clinical Techniques related to Respiratory System <ul style="list-style-type: none"> • oxygen by cannula and mask, demo and practice • oral suctioning 	Fundamentals of Nursing text * See study guide for specific reading and class preparation		
Nov. 19/98 Week 14	Therapeutic Touch Discussion: What research questions might there be related to the use of therapeutic touch?	1. Snyder, M. (1992). Independent Nursing Interventions (2nd ed.). Albany, New York: Delmar, pp. 173–183		
Nov. 26/98 Week 15	Research Day — Presentation of Findings <ul style="list-style-type: none"> • poster presentation • students will display posters and present findings to classmates, instructors and invited guests 		Poster presentation	Nov. 26/98
Dec. 3/98 Week 16	Skill-Testing Exam		See schedule posted on bulletin board	Dec. 3/98
Dec. 7/98 Week 16	Final Multiple Choice Exam – 1½ hours	See exam schedule posted on bulletin board
