v Course Description (required)

This course prepares the student to be able to use e-marketing practices in a business environment. Different e-business concepts and e-marketing applications are covered, both in lectures and in lab examples. Students will examine current e-marketing strategies used by both the Business to Consumer market and the Business to Business market. Using the foundations of traditional marketing, the student will apply new e-marketing solutions and tactics to enhance an online business. By critiquing various web-sites, the student will be able to assess how a business is at customizing it's site, collecting, storing and using it's database, promoting itself, customizing it's offers, completing the sale and delivering to its customers. Students are required to complete two in-lab assignments and one final group project during this course.

v Detailed Course Description (optional)

The uses of Internet Marketing Practices today are spread amongst billions of sites, from Consumer driven to Business driven. Companies are looking to the Internet now to solve most marketing objectives, including but not limited to functions such as:

- Building a Brand Image
- Building Brand Loyalty
- Disseminate Information
- Create Awareness
- Gather Research Information
- Stimulate Trial and Re-Buy
- Increase Distribution
- Measure the effectiveness of Customer Relationship Management Tools, Data Base Marketing and other Direct Marketing techniques online and offline

The Internet is part of the Integrated Marketing Communications program for most companies today. This course looks at all of the marketing functions as they apply to electronic marketing options and applies these functions in a strategic document called an Internet Marketing Plan.
