

MAR 31 1999

BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY

Course Outline **Part A**

Health Sciences
Program: Nursing

NURS 1040
Professional Practice Seminar 1

Hours/Week:	2	Total Hours:	40	Term/Level:	1
Lecture:		Total Weeks:	17	Credits:	2.5
Lab:	6 hrs				
Other:	Seminar to Groups of 24				

Prerequisites

NURS 1040 is a Prerequisite for:

Course No. Course Name

Course No. Course Name

NURS 2040 Professional Practice Seminar 2
NURS 2030 Nursing Practicum 2

Course Goals

Professional Practice Seminar 1 facilitates student understanding of the professional practice of nursing.

Course Description

This seminar course presents the BCIT Nursing model and philosophy, and promotes a beginning understanding of the professional basis of nursing practice. Computer work, projects, written assignments, and discussions with peers and faculty are part of the course.

Evaluation

- A paper that asks students to compare and contrast the image of nursing described in the professional literature, the image portrayed in the media, and the student's view of the image.
- An assignment that asks students to analyze assumptions present in a scenario and identify alternate perspectives that could be taken.
- Attendance and participation in class and activities. **Anyone having trouble participating, please see instructor for assistance.**

Students will participate in deciding the percentage of marks assigned to each.

All written assignments must be word processed.

Course Outcomes

The student will:

1. Appreciate the role of nursing in the current health care system from a historical perspective.
2. Appreciate the impact of the philosophical basis of the BCIT Nursing Program on nursing practice.
3. Discuss the interrelationships of the BCIT Nursing model and their impact on the role of the nurse in practice.
4. Appreciate the role of caring in nursing and its contribution to the health of people.
5. Discuss the patterns of knowing in nursing and their contribution to nursing practice.
6. Understand the concept of research based practice and its relevance for nursing practice and health care.
7. Understand the nurse's role re: advocacy, health promotion, primary health care and referral.
8. Investigate current professional issues.
9. Discuss leadership/followership.
10. Identify assumptions and alternate perspectives when discussing course concepts.

Learning Processes Relevant to this Content

- *Professionalism:* Students will discuss the various aspects of professional practice so that they develop an understanding of the professional nursing role. They will attend a RNABC chapter meeting to identify current professional issues.
- *Communication:* Students will thoughtfully discuss course concepts verbally and in writing. They will learn to be clear and concise in their arguments and to use relevant research and literature to support their views. An introduction to APA style and academic use of APA is included.
- *Systematic Inquiry:* The ways of knowing including the empirical will be discussed in this course. Students will start to critically review literature and research. They will be encouraged to identify assumptions, suggest alternatives and consequences and be clear on the context of issues. They will be encouraged to provide evidence for their views. An introduction to CD ROM data bases and computer software is included in the course. Students are expected to access Internet sites for projects.
- *Learning:* Students will be required to take responsibility for their learning. Individual learning styles will be discussed. They work in reading groups so they will be responsible for sharing their thoughts clearly in class.
- *Leadership:* Students will discuss concepts of leadership in the class. Issues in decision making, priority setting, and leadership/followership styles will be discussed using case studies. Students will be encouraged to identify their style and consider ways to develop it.

Course Record

This Course Outline is current, accurate, and complies with BCIT policy 5013 on course outlines.

Text(s) and Equipment

Required:

1. **RNABC Membership** — Cost \$37.45 per year, starting in March/99. The following two documents will be sent with membership.
 2. Canadian Nurses Association. (1997). *Code of ethics for registered nurses*. Ottawa: Author.
 3. Registered Nurses Association of British Columbia. (1992). *Standards of nursing practice in British Columbia*. Vancouver: Author.
- * **Note:** It takes 8 weeks to process membership applications so apply early.

Recommended:

American Psychological Association. (1994). *Publication manual of the American Psychological Association*. (4th ed.). Washington, DC: Author.

Course Notes (Policies and Procedures)

1. Students are encouraged to identify individual learning needs that may be met in this course. Please talk with the teacher to see how this might be accomplished.
2. During the first class, the evaluation methods will be discussed and the percentage of marks assigned to each will be identified.
3. The reference readings (except those from required booklets) are on reserve in the library. The material will be on two day loan.

4. **All the readings do not have to be read by every student. Reading groups should be formed so that readings are distributed among the members. Reading groups should have a maximum of four members to ease working relationships and communication between members.**
5. Students will participate in a verbal review of the course at midterm and a written review at the end of the term. This review will include a discussion of teaching methods, resources, and course structure. The midterm review is aimed at meeting the needs of the students currently taking the course. The end of term review is aimed at modifying the course for the next class.
6. Unforeseeable circumstances may necessitate the alteration of course content, sequencing, timing or evaluation. As much as is possible, students will be given adequate notice of such changes.

Participation / Attendance:

1. Attendance is required in this course because of the importance of dialogue in thinking and learning. The different viewpoints shared during the seminar will help expand the thinking of all participants. **If students are absent for more than 10% of the planned activities for other than medical reasons, they may be prohibited from completing the course.**
2. It is not enough that people are present in body. People must participate so that all can expand their thinking about the subject being discussed. People will be called randomly to share their thoughts.

Your learning is directly related to the effort you put into the reading and class activities. Therefore, class participation in NURS 1040 counts for a percentage of your final grade. **Participation includes doing the reading and writing preparation for class and talking actively in the group.** The teacher will monitor your preparation and participation.

Students in the previous class made some suggestions to improve the course for subsequent learners. They requested that we distribute questions or things to consider about the readings to help them think about the topic to be discussed. They suggested that those people who reviewed the same reading meet to discuss the meaning of it before exchanging information about all the readings. They also suggested that people do the readings early in the week so that the questions could be considered carefully and the reading understood at some depth. So, **write your answers to the questions and come prepared to discuss the readings with your group members.** The questions should not limit your thinking about the topics. Please come to class with other relevant questions to discuss with your group.

Sometimes, the preparation sheet will ask you to write a short summary of the reading or an aspect of it. **Come to class with the writing done and be prepared to share your writing with a group member.** The group member will give you feedback on the clarity of your writing and you will give feedback about the clarity of another group member's writing.

As well as reading and writing preparation for class, **you are expected to talk actively with your group members each session.** Sometimes, you will be called upon to share your group's discussions with the larger class so be prepared to do this. If you have trouble participating in class or are uncomfortable doing so, please get assistance from the instructor and group members.

Laboratory Experiences:

1. **Orientation to Library and CD-Rom data bases:** During the first week of classes, orientation sessions will be scheduled for each set. Please ensure that you attend these sessions so that you become familiar with the data bases available at BCIT.
2. **Orientation to word processing using APA template:** During the first week of classes, an orientation session will be scheduled for each set. We will provide an APA template for you to use to word process your assignments in this program and help you use it. If you are unable to attend these sessions, you will be responsible for acquiring the template yourself.
3. **Orientation to academic writing and the use of APA style:** During the first half of the term, there will be time scheduled for each set to review the style and the criteria for written assignments. Please come to the sessions prepared to ask whatever questions you have about writing nursing papers.

Written Assignments:

1. As the purpose of the written assignments is to help students develop their ability to reason and reflect, students may request assistance with the written assignments as they need it and as faculty are able to give it. There is no penalty for this assistance. **It is strongly advised that students discuss the first assignment with their teacher and get editing assistance from the English tutorial.**
2. **Assignments must be submitted by 1600 hrs on the due date.** Put them in the appropriate faculty box in SE 12-418.
3. If an assignment is late, the mark for the assignment will drop 15% for each school day it is late.
4. **All assignments must be completed to achieve credit for the course.**

Assignment Details

A. Assumption Analysis — Due October 5, 1998.

Choose one of the following scenarios and identify the assumptions behind the decisions the person is making. Then, suggest how the person could check the validity of these assumptions and in what circumstances the assumptions would be valid. Once this is done, suggest at least two alternative perspectives that could be taken by the person in the scenario. Refer to the reading by Brookfield (1987) to clarify the meaning of words like assumption, context and perspective.

Refer to the marking criteria found on the next page to help you write your paper.

Keep length to a maximum of 4 pages of text (exclusive of title page and reference page).

Scenario 1

Joan is 30 years old. She is married and has two preschool children. She is in level 1 of the Nursing Program at BCIT. She is trying to handle the demands of the program as well as continue to care for her children, home, and husband as she did prior to coming into the program. She has no course credits so finds it difficult to do all that is needed each day. After school, she picks up the children from daycare, makes dinner, plays with the children until bedtime, settles them, and then starts her school work. She is having trouble keeping up

with her courses, is getting more and more tired, and feels more and more like a poor mother and wife. If only things would slow down, she would be able to cope better. To ease the situation, she is negotiating more and more extensions, but there just isn't enough time to do everything. She really wants to be a nurse, but she is considering quitting school and returning to full time parenting until the children are older. She thinks the family will appreciate this sacrifice she will make on their behalf because it will mean that the family has more money and can spend more time together. She will be able to participate more as a partner with her spouse and she will feel more capable as a person and will finally feel refreshed and energetic.

Scenario 2

Sarah is a medical nurse. Before the 0730 report, she learns that she is to care for a 20 year old female patient who has an infection and uncontrolled abdominal pain. There is a note on the Kardex that says she abuses drugs and is probably HIV positive. The morning report says:

- She talks about her need to get out of hospital quickly or "Dan will be really upset."
- Her VS remain unstable, and her pain is still unresolved.
- During the previous evening, the nurse went in to talk with her about her need to leave the hospital, but she found the patient moaning in pain. As the evening progressed, she complained of increasing pain in her abdomen so a strong analgesic was given at 2300, 0330 and again at 0630 hours. She wanted the analgesic more frequently, but this was all that was ordered by the physician.

Following the morning report, Sarah decides to assess the patient's pain and abdomen and try again to talk with her about her need to leave.

At 1000 hours, Sarah is very frustrated, and she shares the following dialogue with a fellow nurse. "I can't work with that girl again. She's not in pain. She's faking it to get the morphine! She says she has excruciating pain yet literally hops out of bed to the bathroom. She probably shoots up whenever she can so we need to take out the IV so she can't use the port for heroin. She keeps talking about Dan, but won't say what's bothering her. I'm tired of trying to reason with people who don't want to be helped. If she wants to kill herself why should we interfere? I've got to get my assignment changed, but if I talk with the charge nurse she'll just say I'm being unprofessional."

Scenario 3

Linda is a Level 1 nursing student in the practicum during Week 10 of the BCIT Nursing Program. It is Tuesday morning before taped report and she sees that Alicia is her RN today. She recalls that another student had a rough time working with one of the staff last week and she thinks that her name was Alicia. After report, Alicia asks Linda all kinds of questions about her preparation, what she is planning to do and why, and how she is going to do some of the skills. It takes so long that Linda is late giving her morning medications. Linda starts to get frazzled and takes short cuts to try to catch up. She does a partial bed bath instead of the shower that she had planned and decides to leave mouth care and hair combing until after lunch. Alicia seems to be watching Linda closely and constantly asks if Linda needs any help. By 1000 hr, the bed is not made nor is the patient up yet, but Linda is so upset that she takes a coffee break. When visitors arrive a short time later, the patient is very unhappy and complains about the nursing care. The visitors find Alicia and complain about the care given.

Alicia speaks with Linda about this and asks her to talk with her instructor about how to proceed. Linda feels like a total failure. When she finds the instructor, she blames her bad day on the nurse. "She asks too many questions, I start to wonder if I know what I am doing, she pressures me to move faster and she won't leave me alone. How could I possibly perform well under these circumstances! If I was left alone I would have done just fine."

Assignment Details (Continued)

Scenario 4

Patricia is 26 years old. She has been nursing on this medical unit since graduation almost three years ago. She notices that two nurses, Bob and Marianne, are disruptive influences. Their behavior during report is difficult to listen to. They make sarcastic and derogatory comments about patients and they deride the assessments and recommendations of the nurses reporting. Whenever she is supposed to go on a break, they take much more time than allowed so she is late going. She is very concerned about the care they give to people — they are in and out of rooms so quickly, they couldn't possibly give decent care. Patricia is still one of the youngest nurses on the ward so she does not have the seniority to approach these nurses directly. She decides to share her feelings with two of the oldest nurses on the unit. She thinks that the three of them can make Bob and Marianne stop being so disruptive. The unit would be a great place to work if their behavior changed.

Marking Criteria for assumption paper:

The content of the paper (65% of total mark):

- Assumptions:
 - /10 all scenario assumptions are identified.
 - /10 ways of validating each assumption are reasoned and comprehensive.
 - /10 the context in which each assumption might be valid is identified.
 - /10 the paper is free of own assumptions or own assumptions are identified.
- There is evidence given to support the assumptions identified:
 - /10 evidence from the scenario is used to support each assumption identified.
 - /5 ideas from other authors are referenced. APA style is used.
- The complexity of the issue being discussed is clear:
 - /10 at least two alternative perspectives that could be taken about the scenario are discussed.

The structure of the paper (25% of the total mark)

- /4 The tone or style of the paper is appropriate to an academic audience. This means that slang terms are not used, the writing is clear and understandable, and the third person is used unless specifically referring to own views. Also, views of others are acknowledged.
- /4 There is an introduction that presents the organization of the paper and the ideas being discussed.
- /3 There is a conclusion that summarizes the ideas of the paper.
- /4 Paragraphs form units of thought, include a topic sentence and details that support the topic sentence. There are smooth transitions between paragraphs.
- /10 APA format is followed:
 - ▶ character spacing is appropriate (2 marks)
 - ▶ font style and size are appropriate
 - ▶ margins are appropriate
 - ▶ paper color and weight is appropriate
 - ▶ pagination is appropriate
 - ▶ the paper is in a cover.
 - ▶ pagination includes a header with appropriate spacing
 - ▶ the necessary information is included in the centered area of the title page.
 - ▶ there is a title on the first page of text.

Assignment Details (Continued)

The mechanics of writing papers (10% of the total mark):

- /3 Sentence structure
- /4 Grammar and verb tense
- /3 Spelling and punctuation

B. Image Paper — Due November 16, 1998.

Review 3–5 pieces of professional **nursing** literature to summarize the thoughts that professional nurses have about the image of nursing today. Describe one example of the image of nursing portrayed in one type of media (radio, television, fiction books, movies, etc.). Describe your thoughts about the image of nursing. Compare and contrast these two views with your view of the image of nursing today. See marking criteria for help identifying the content of the paper.

Keep length to a maximum of 7 pages of text (exclusive of title page and reference page) and enclose in a cover.

Marking Criteria for

The content of the paper (65% of mark):

- The literature:
 - /10 3–5 pieces of professional nursing literature are reviewed. More than one perspective is included. Research, opinion and/or anecdotal evidence is described as such.
 - /5 Evidence from the piece of literature is used to support the conclusions you make.
 - /5 Themes identified in the literature are summarized clearly in one paragraph.
 - /3 Own and author's assumptions are identified.
- The media:
 - /5 One example of the image of nursing portrayed in one type of media is described clearly. Specific detail to support conclusions is included.
 - /5 At least two perspectives about the image of nursing that could be taken from the media example are described.
 - /2 Own assumptions about the two identified perspectives are clearly explained.
- Own views:
 - /10 Own views of the image of nursing are clearly described in some detail.
 - /5 The source of your views is clearly described using specific experiences, conversations, etc.
- Similarities and Differences between the literature, media and own views:
 - /10 The similarities and differences are clearly identified.
 - /2 Own assumptions are clearly identified.
 - /3 The context in which the assumptions are valid is noted.

The structure of the paper (25% of the mark):

- /4 The tone or style of the paper is appropriate to an academic audience. This means that references to other authors are made, academic language is used, and research is related accurately.
- /4 There is an introduction that presents the organization of the paper and the ideas being discussed.
- /2 There is a conclusion that summarizes the ideas of the paper.

Assignment Details (Continued)

- /4 Paragraphs form units of thought, include a topic sentence and details that support the topic sentence. There are smooth transitions between paragraphs.
- /11 APA format is followed:
 - ▶ character spacing, font style and size, paper color and weight, and margins are appropriate.
 - ▶ pagination is appropriate and includes a header with appropriate spacing.
 - ▶ the necessary information is included in the centered area of the title page.
 - ▶ there is a title on the first page of text and headings are done appropriately.
 - ▶ the reference list is according to APA format. (2 marks)
 - ▶ the media source is referenced appropriately in text and reference list. (2 marks)
 - ▶ citations in the text are appropriate.
 - ▶ quotes in the text are done appropriately.
 - ▶ the language of the paper is neutral.

The mechanics of writing papers (10% of the mark)

- /3 Sentence structure
- /4 Grammar and verb tense
- /3 Spelling and punctuation
