SPECIFIC UNIT OBJECTIVES:

At the end of this course, students should be able to:

1. Identify the roles of the management accountant in the organization's planning and control functions.
2. Prepare financial statements for a manufacturing organization.
3. Define and differentiate between a variety of terms used in cost and managerial accounting.
4. Distinguish between job-order, process costing and activity based costing systems with regard to the methods of accumulating costs.
5. Develop predetermined manufacturing overhead rates for application to jobs.
6. Illustrate the flow of costs through a job cost system.
7. Determine and implement alternative methods of dealing with under-or over-applied overhead.
8. Analyze the effects of changes in prices, volumes, and cost structures on organizational profitability and do sensitivity analysis of these relationships.
9. Complete all the budgets and supporting schedules required in the preparation of a master budget.
10. Apply the concepts of responsibility accounting to management evaluation and control.
11. Prepare performance reports incorporating flexible budgets.
12. Develop standard costs for direct materials, direct labor, variable and fixed overhead and compute the appropriate variances.
13. Evaluate and implement the decision of whether or not to investigate a variance.
14. Evaluate the effects of alternative methods of inventory-costing.
15. Evaluate the effects of alternative denominator activity levels in absorption costing.
16. Describe and implement alternative methods of disposing of variances at year end.
