

APR 11 1997

BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY

Course Outline **Part A**

School of Health Sciences

Program: Medical Radiography

NURS 1180
PATIENT CARE I

Hours/Week:	2	Total Hours:	34	Term/Level:	Level 1
Lecture:	Varies	Total Weeks:	17	Credits:	2.5
Lab:	Varies				
Other:					

Prerequisites	None
----------------------	-------------

Course Goals

To provide the student with knowledge and skills required to provide patient care in the Radiology department.

Course Description

Introduces students to the basic safety concepts of patient care. It includes observational and communication skills, body mechanics, fire safety and medical and surgical asepsis. This course also introduces the basics of the psychological and social environments of the health care organization.

Evaluation

		Comments:
		To successfully pass this course the student must :
Midterm Exam	50%	1. Achieve a mark of 60%.
Final Exam	50%	2. Successfully complete the Student Progress Sheet.
		3. Complete all assignments.
TOTAL	100%	

Course Outcomes and Sub-Outcomes

Upon successful completion of this course, the student will be able to:

1. Explain the interrelationships between the medical radiography technologist and other members of the health care team.
2. Assess patients and collect relevant patient information prior to performing diagnostic procedures.
3. Explain the required interventions when working with:
 - a. patients experiencing pain, drowsiness nausea, vomiting, vertigo and syncope.
 - b. patients who have a physical disability related to a cerebral vascular accident, arthritis, a hearing impairment, or impaired vision.
4. Use body substance / universal precautions and isolation protocols appropriately.
5. Maintain safety and comfort for self, the patient and colleagues when:
 - a. moving, positioning, lifting and transferring
 - b. assisting patients with elimination needs
 - c. assisting patients with dressing and undressing
 - d. administering cleansing and barium enemas
 - e. working with patients who have tubes inserted and/or are attached to specialized equipment
6. Use surgical asepsis when performing the following procedures:
 - a. drawing up contrast media
 - b. discontinuing an intravenous
 - c. setting up a sterile field

Text(s) and Equipment

Required:

Kozier, B., and Erb, G., and Olivieri, R. (1991). Fundamentals of nursing: Concepts, process and practice. (4th ed.). Redwood City, California: Addison-Wesley.

Packets containing the readings and textbooks are available on reserve in the library and on overnight loan.

Course Notes (Policies and Procedures)

This course consists of lectures, modules, discussions, demonstrations and laboratory practice. It is designed to enable the student to understand, describe and implement specific patient care skills in order to care effectively for patients undergoing diagnostic tests in the Radiography department.

The student must complete all assigned readings and modules prior to the designated class time and is expected to come to class prepared to discuss and participate. Assignments are designed to assist the student to integrate patient care skills in the Radiography department. Students are expected to come to class prepared to discuss and practice the designated skill and to demonstrate their ability to perform the skill to an instructor.
