Prerequisites

Course No. Course Name

MRAD 2200 Clinical Education

MRAD 3300 is a Prerequisite for:

Course No. Course Name

MRAD 4400 Clinical Education

Course Calendar Description

Under the supervision of the clinical instructor/hospital technologist, the student will gain experience in fluoroscopic procedures, IVP procedures, basic skeletal radiography and general clinical skills.

Course Goals

The student must satisfactorily complete the positioning units not completed in MRAD 2200 in order to continue into MRAD 4400. These Level 3 requirements have been identified in the Clinical Workbook. The student must demonstrate professional conduct and attitudes (refer to form). Any discrepancies to the afore-mentioned professional conduct and attitudes will constitute dismissal from the program.

Students must complete clinical requirements from the following units:

1. Upper extremities, thoracic cage, shoulder girdle and spine
2. Lower extremities and pelvic girdle
3. IVP procedures, chest and abdomen
4. Fluoroscopic procedures

In addition to the above,

5. **All students must complete the UNASSISTED WORK RECORD SHEETS.**
6. **All students must complete 10 successful blood pressure readings (5 cases must be patients and 5 cases can be students/clinical staff).**

Evaluation

The student must perform two positioning evaluations (**IVP and Fluoroscopy**). These requirements must be successfully completed in order to proceed into Level 4.

The Level 3 requirements are:

- a) Fluoroscopy
- b) IVP, Chest and Abdomen
- c) Upper and Lower Skeletal
- d) Unassisted Work Record (as indicated)

** All students must successfully complete a Department Orientation for each **new** clinical site.

It is the **student's responsibility** to ensure completion of all clinical requirements.

Grading Scheme for Clinical Evaluation:

1. For successful evaluation, the student must achieve a competent (3) standing or better on all evaluation criteria designated **Critical Behaviors "C."**

Failure to achieve any of the designated Critical Behaviors requires a repeat evaluation.

For successful evaluation, the student must achieve a marginal (2) standing or better for those evaluation criteria **not deemed** as Critical Behaviors.

A **maximum of two (2) marginal** achievements allowed per evaluative section, otherwise a repeat evaluation is required.

Repeat Evaluations:

If the first evaluation is unsuccessful then:

- a) student must perform 3 unassisted cases of the same anatomical area.
- b) repeat the evaluation.

If the second evaluation is unsuccessful, the student will repeat steps a) & b) above.

The student can continue in this manner until:

- a) a successful evaluation is obtained.
- b) the clinical term has ended.

* Deadline for achieving successful evaluation is the last clinical day.

** Students will not be allowed to change anatomical areas from their selected 1st evaluation, e.g., upper, lower extremities, chest, abdomen.

Course Learning Outcomes/Competencies

Upon completion of this course, the student will be able to:

1. interpret patient requisition with minimal assistance to ensure the following: exam requested, patient ID and physician signature.
2. prepare the radiographic room for the examination to be done.
3. provide satisfactory patient care for all patients.
4. communicate effectively with the patient prior to and during the examination.
5. interact appropriately with all members of the health care team.
6. apply satisfactory positioning technique skills for all examinations undertaken.
7. handle the required equipment in a competent manner.
8. carry out acceptable radiation safety precautions for patients, staff and self at all times.
9. document information as necessary for each procedure undertaken.
10. competently critique radiographs associated with all examinations undertaken.
11. organize work efficiently.
12. demonstrate professional behaviors and attitudes.
11. demonstrate professional behavior and attitudes.

Course Content Verification

I verify that the content of this course outline is current, accurate, and complies with BCIT Policy.

Learning Resources

Required:

- Workbook for Clinical Education Requirements MRAD 2200/3300
 - R & L markers
 - Tape measure
 - Pens, felt tip and ball point
 - Uniform and shoes as detailed in the Clinical Education Student Manual
 - Name tag, level pin, TLD
 - Student clinical positioning notebook
-

BCIT Policy Information for Students

Withdrawal from Clinical Education

Mandatory Withdrawal

Students will be withdrawn from the clinical environment when they consistently fail to achieve the minimum acceptable standards in one or all of the following areas:

- BCIT Student Policies for Clinical Experience
- Adherence to assigned department policies and procedures
- Patient care
- Positioning skills
- Interpersonal relationships
- Professional behaviors and attitudes
- Radiation safety
- Equipment handling

Voluntary Withdrawal

Students may voluntarily withdraw from Clinical Education MRAD 3300. Counseling with respect to career choices is available to all students.
