

MAR 31 1999

BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY

Course Outline **Part A**

School of Health Sciences

Program: Nursing

Option:

**NURS 2000**

**Nursing and Health Issues 2**

---

<b>Hours/Week:</b>	3	<b>Total Hours:</b>	51	<b>Term/Level:</b>	2
<b>Group Work:</b>	3	<b>Total Weeks:</b>	17	<b>Credits:</b>	3.5
<b>Independent Work:</b>					
<b>Other:</b>					

---

### Prerequisites

### NURS 2000 is a Prerequisite for:

Course No.	Course Name	Course No.	Course Name
NURS 1000	Nursing and Health Issues 1	NURS 3000	Nursing and Health Issues 3
		NURS 3030	Nursing Practicum 3

---

### Course Goals

Nursing 2000 fosters students ability to explore health situations from a professional nursing perspective by working collaboratively in small groups.

---

### Course Description

Students will explore selected common health experiences in order to understand the impact it has on the individual, family, society, and health care system. While developing their understanding, students will access information from a variety of sources including professionals in hospitals and in the community. A thorough exploration of the health situation will assist students in developing a professional context from which they can plan nursing care. The health situations discussed in this course are related to rheumatoid arthritis and lung cancer.

The teaching/learning strategy used in this course is problem based learning.

---

### Course Format

Students will meet for three hours each week with a tutor to explore the situation and to identify learning needs. Students will do research independently then work to apply the knowledge to the situation when the group reconvenes. The group is required to function effectively so students will focus on both developing group process skills and learning content relevant to the situation. Students will complete 2 situations during the term. A simulated patient may be associated with the health situation.

## Evaluation

- Group skills — 15%  
**Satisfactory ability to function effectively in the problem-based group is required for passing.**
  - Research/presentation skills — 15%
  - A paper that discusses one of the central concepts of the Level 1 or Level 2 courses — 30% of mark.
  - A written test — 35% of mark.
  - A take-home multiple choice test — 5% of mark
- 

## Course Outcomes

The student will:

1. Develop a theoretical knowledge base related to nursing and specifically nursing's role in relation to selected common health experiences.
  2. Develop ability to accept a variety of perspectives related to the situation.
  3. Recognize contextual influences as relevant to the situation.
  4. Actively work in the group to develop a planned approach towards understanding the situation.
  5. Apply independent study material to the situation as planned and share information in the group that is clear, focused on the situation and defensible.
  6. Participate actively in the group so that the group functions productively.
  7. Develop ability to give feedback to other members of the group in a manner that facilitates the group goal.
  8. Establish relationships with group members that achieve the tasks of the group.
  9. Develop ability to monitor group process.
  10. Reflect on own growth in developing effective group skills.
- 

## Course Content

Students will work in learning partnerships to explore the following situations in this level:

- Lung cancer. This situation will also present palliative care.
- Rheumatoid arthritis. This situation includes preoperative, intraoperative and postoperative care.

When exploring the above situations, students will consider the following concepts:

- Health/Illness
  - ▶ \*Chronic Illness
  - ▶ \*Palliation
- \*Pain
- \*Loss and Grief
- \*Dying
- Stress

## Course Content (cont'd.)

- Health Promotion
  - Determinants of Health
    - \*Poverty
  - Community Resources
  - Nutrition
  - \*Patient Education
- Growth and Development
- Culture
- Group Process
- Context
  - Spiritual
  - \*Social/Economic

\*New in Level 2

In analyzing a situation the students may identify many other relevant content areas. These will be discussed within the context of the situation as time and group interest permits.

---

## Process Threads Relevant to this Course

- Professionalism — Students will develop an understanding of nursing care that is required for safe practice. Also, they will need to be accountable and responsible to follow through with the work they have agreed to do and develop a knowledge base that is useful in practice.
- Communication — Working effectively in teams is a focus of this course. This includes establishing relationships with members, sharing ideas, clarifying thoughts, giving feedback and monitoring group functioning. Students are expected to improve the abilities they developed in the first level course. The group will facilitate students' development of clear thinking and in communicating that thinking.
- Learning — Students will be required to take responsibility for their learning and for preparing material for their fellow classmates that is accurate and relevant.
- Leadership — Students will be assertive as the group works on the health situation. They will develop skills of group problem solving and consensus decision making as well as other group process skills.
- Systematic Inquiry — Research or evidence that is brought to bear on the health situation may be questioned by the group and the student will be helped to critique the data in the group situation.

The process of working in groups and bringing information to bear on a health situation for the purpose of understanding the situation more clearly promotes the development of a professional nurse. The purpose of understanding the situation may lead to developing a plan for approaching a simulated patient to try out some aspect of the professional role in nursing.

## Course Record

This course outline is current and accurate and complies with BCIT Policy 5013 – Course Outlines.

### Text(s) and Equipment

#### Required:

1. Canadian Nurses Association. (1997). *Code of ethics for Registered Nurses*. Ottawa: Author.
2. Registered Nurses Association of British Columbia. (1998). *Standards of nursing practice in British Columbia*. Vancouver: Author.
3. Sims, L.K., D'Amico, D., Stiesmeyer, J.K., & Webster, J.A. (1995). *Health assessment in nursing*. Menlo Park, CA: Addison Wesley.
4. Snyder, M. (1992). *Independent nursing interventions* (2<sup>nd</sup> ed.). Albany, NY: Delmar.
5. **A fundamentals text is required.** One of the following fundamentals texts is suggested:
  - Craven, R.F., & Hirnle, C.J. (1996). *Fundamentals of nursing: Human health and function* (2<sup>nd</sup> ed.). Philadelphia: Lippincott.
  - DuGas, B.W., & Knor, E.R. (1995). *Nursing foundations: A Canadian perspective*. Scarborough, ON: Appleton & Lange Canada.
6. **A medical-surgical text is required.** One of the following texts is suggested:
  - LeMone, P., & Burke, L.M. (1996). *Medical-surgical nursing: Critical thinking in client care*. Menlo Park, CA: Addison Wesley.
  - Smeltzer, S.C., & Bare, B.C. (1996). *Brunner & Suddarth's textbook of medical-surgical nursing* (8<sup>th</sup> ed.). Philadelphia: Lippincott.

### Text(s) and Equipment (cont'd.)

7. **A nursing/medical dictionary is required.** One of the following two texts is suggested:
  - Anderson, K.N., Anderson, L.E., & Glanze, W.D. (1994). *Mosby's medical nursing and allied health dictionary* (4th ed.). St.Louis: Mosby.
  - Miller, B.F., & Keane, C.B. (1992). *Encyclopedia and dictionary of medicine, nursing and allied health* (5th. ed.). Philadelphia: Saunders.
8. **A diagnostic tests handbook is required.** One of the following two texts is suggested:
  - Fischbach, F. (1996). *A manual of laboratory and diagnostic tests* (5th ed.). Philadelphia: Lippincott.
  - Malarkey, L.M., & McMorro, M.E. (1996). *Nurse's manual of laboratory tests & diagnostic procedures*. Philadelphia: Saunders.
9. **A pharmacology handbook is required.**
  - A standard nursing care plan book is recommended.
  - American Psychological Association. (1994). *Publication manual of the American Psychological Association*. (4th. ed.). Washington, DC: Author. This text is in the reference section of the BCIT library.

---

### Course Notes (Policies and Procedures)

1. Students are encouraged to identify individual learning needs that may be met in this course. Please talk with the tutor to see how this might be accomplished.
2. During the first class, the evaluation methods will be discussed.
3. Students will participate in a verbal and/or written review of the course at midterm and the end of the term. This review will include a discussion of teaching methods, resources, and course structure. The midterm review is aimed at meeting the needs of the students currently taking the course. The end of term review is aimed at modifying the course for subsequent students.
4. Unforeseeable circumstances may necessitate the alteration of course content, sequencing, timing or evaluation. As much as possible, students will be given adequate notice of changes.

---

### Participation/Attendance

We believe that dialogue contributes to both thinking and learning. Therefore:

1. Attendance is required in this course. The different viewpoints and experiences shared during the session will expand the thinking of all participants. Also, students will be doing independent work to share with the group. This work is required for the group to accomplish its task and move on to other tasks. **Therefore, if students are absent for more than 10% of the planned activities without a medical reason, they may be prohibited from completing the course (see BCIT Policy re: attendance).**

### **Group Skills — 15% of Final Mark**

1. **Each student must participate to develop their group skills. Productive group function is a major expectation of this course.**
2. Students are expected to:
  - work actively in each session.
  - give feedback to members so that group goals are achieved.
  - establish working relationships with members.
  - develop the ability to monitor group process.
  - reflect on their own growth in developing effective group skills.

Criteria for group skills is distributed and discussed at the beginning of the term. Weekly written or verbal discussions of group function will occur so that each person can develop their skills. A four-week and a midterm summary of skills will be done to direct individual learning. A final assessment of each student's ability to function in the group will be done at the end of the term. **All students must pass in this area to receive the earned marks for the research/presentation skills, concept paper, problem-solving exam and take home test. If students do not receive a pass for group skills, an unsatisfactory is received for the course.**

3. A mark will be negotiated between the tutor and each student, in consultation with the entire group.
4. It is the tutor's responsibility to make the final recommendation about a student's group skills mark.

---

### **Research/Presentation — 15% of Final Mark**

1. **Each student will conduct research of various topics assigned by the group. The research done is to gain a variety of perspectives of the topic. Besides using the required textbooks, research should include references from the resource lists, academic and nursing practice journals, books in the library, the internet, personal experiences and/or community resources.**

This information is then presented in meaningful and creative ways to the group, helping students to learn the content of the course.

The principles of teaching and learning for adults should guide the format of the presentations.

2. **Criteria for research/presentation skills is distributed and discussed at the beginning of the term. Written or verbal discussions of presentations will occur so that each person can develop their skills. A four-week and a midterm summary of skills will be done to direct individual learning. A final assessment of each student's ability to research and present will be done at the end of the term.**
3. A mark will be negotiated between the tutor and each student, in consultation with the entire group.
4. It is the tutor's responsibility to make the final recommendation about a student's research and presentation skills.

## Written Assignment

**CONCEPT PAPER — due Monday, March 8, 1999 at 1230 hours.**

### 30% of Final Mark

1. The purpose of the assignment is to provide students with the opportunity to explore and discuss a concept encountered in Level 1 and 2 Nursing and Health Issues. The paper will define and give a clear in-depth exploration of the selected concept reviewed in the researched material. The paper will show the reader that the student has studied the concept, done research, and thought about how this new knowledge can influence their present nursing practice and future practice.
2. A literature review is to be done to gain a variety of perspectives on the chosen concept and to relate the concept to your nursing practice. You will need to scan several pieces of literature to select at least 6 to 8 literature sources to use in your paper. A minimum of 2 sources are to be primary sources. (***A primary source is literature written by the person who conducted the research or proposed the theory or model.*** A secondary source is a description of a study or studies prepared by someone other than the original author.) Your literature review should use primary sources whenever possible. Some secondary sources may be used, **your textbooks are an example of secondary sources but are not appropriate to use for a literature review.** For the purposes of this concept paper, secondary sources such as journal articles that discuss or apply someone's work can be used. The original author should also be consulted. Dictionaries or encyclopedias can be used for definitions, but they are not to be part of the 6 to 8 sources for exploring the concept.
3. **Your paper must follow APA guidelines for format and content.**
4. **It is strongly recommended that students discuss the concept paper with their tutor.** Students may request assistance from the tutor as needed without penalty.
5. **The paper must be submitted to receive a mark for the course.** Submit your paper to your tutor's mail box SE12 418 by 1230 hrs. on the due date. If your paper is late, 15 marks will be deducted for each school day it is late. Extensions are granted in exceptional situations (e.g., illness with a medical note, bereavement, etc.).
6. Marks will be assigned according to three criteria; content, structure or organization and mechanics of writing. The paper will be marked out of 100. See marking criteria on following page.
7. **The text of the paper *may not* exceed 10 pages in total.**

## **I. CONTENT OF THE PAPER: 70 MARKS**

### **A. The literature review shows analysis of the concept. (50 marks)**

- / 5 defines the concept
- /25 discusses the concept as a whole
- / 5 discusses the similarities within the literature
- / 5 discusses the differences within the literature
- / 5 includes references that provide at least 2 different perspectives on the concept
- / 5 includes at least 6–8 references with a minimum of 2 primary sources

### **B. The concept is applied to your nursing practice (20 marks)**

- / 8 describes your nursing practice
- /12 discusses how your understanding of the concept can or will be applied to your nursing practice

## **II. STRUCTURE OF THE PAPER: 20 MARKS**

### **A. The structure includes the organization and writing style of the paper. (14 marks)**

- / 2 written in a tone or style appropriate for health care professionals
- / 1 includes an abstract (see APA manual abstract requirements)
- / 4 includes an introduction which presents the ideas being discussed and the organization of the paper
- / 4 includes a conclusion that summarizes the paper
- / 3 each paragraph has a topic sentence, discusses one idea, and there is a clear transition between paragraphs

### **B. The paper follows APA guidelines (6 marks)**

- / 2 uses correct format for references list
- / 2 uses correct citation for references in body of paper
- / 2 includes a title cover page, page numbers and headings

## **III. MECHANICS OF WRITING: 10 MARKS**

### **A. The paper is written according to English conventions. (10 marks)**

- / 3 sentence structure
- / 3 grammar
- / 2 spelling
- / 2 punctuation

\_\_\_\_\_ Total marks out of 100

## Examination Details

**PROBLEM SOLVING EXAM — 35 MARKS**, about three hours long, held during the PBL session of Week 16. April 28, 1999.

1. Students will be presented with a health situation.

In **Part A**, they will develop a comprehensive list of ten (10) different concerns/issues/problems that are related to a minimum of five (5) different course concepts. They will identify a method of validating these issues, concerns and/or problems then hand in this part of the exam to the tutor. The student will record on carbonless paper so they may have a copy of this exam for the next part. This part of the exam will count for **10 marks**.

In **Part B**, they will receive additional patient data for the situation.

- They will list the top four priority issues/concerns/problems relevant to this data that they should pursue further. They will describe the evidence in the case that supports the inclusion of each additional issue/concern/problem. They may include issues from Part A if they are relevant. This will count for **8 marks**.
  - They will include a rationale for choosing these three, counting for **5 marks**.
  - For each of the four (4) priority issues, concerns and/or problems, they are to list a minimum of three (3) nursing interventions that would be appropriate. They include a rationale for why these interventions are appropriate for this situation. This will count for **12 marks**. Both the intervention and the rationale must be specific and correct to receive full marks.
2. The exams will be marked by the tutor and the marks will be posted during Week 17.
  3. **All students must pass this exam to achieve credit for the course.**

## **A TAKE-HOME MULTIPLE CHOICE TEST — 5 MARKS,**

1. Distributed during the PBL session of Week 13 and returned Monday, April 12, 1999 at 1230 hours.
2. The quiz will be returned for a brief discussion to students in a PBL session.
3. Students must complete both quizzes to achieve credit for the course.
