## TEACHING METHODS

We will be using teaching methods which have proven most effective for teaching students at BCIT:

1. **Teamwork.** Just as in all courses at BCIT, you will be working in small groups. This will allow you to develop the interpersonal skills you need to succeed at BCIT and in the workplace. You will also learn more in groups as you teach and support each other.
2. **Peer-editing.** We will spend the first part of each class editing student writing. As well, you'll work with one or two partners to locate and correct errors in each other's work
3. **Explaining in your own words.** You'll be reading from textbooks, case studies, and handouts and then putting the ideas into your own words. You will know you have gained knowledge and language skills when you are able to explain the ideas clearly to your team members and to your instructors.
4. **Key visuals.** You will learn how to express ideas in graphics (primarily tables and classification trees). These graphics, which we call "key visuals," will help you to understand ideas and present them more clearly to others.
