

FEB 26 2004

Course Outline

A POLYTECHNIC INSTITUTION

School of Health Sciences

Program: Bachelor of Technology in Nursing

Option:

NURS 3020**Clinical Techniques 3 — Laboratory****Start Date:** January, 2004**End Date:** May, 2004**Total Hours:** 34 **Total Weeks:** 17**Term/Level:** 4 **Course Credits:** 2**Hours/Week:** 2 **Lecture:** 1 **Lab:** 1**Shop:** **Seminar:** **Other:****Prerequisites**

Course No.	Course Name
NURS 2020	Clinical Techniques 2

NURS 3020 is a Prerequisite for:

Course No.	Course Name
NURS 4530	Nursing Practicum 5
or	
NURS 7030	Nursing Practicum in a Specialty Unit
and	
NURS 7070	Nursing Practicum in the Community

■ Course Description

This laboratory course presents nursing skills related to intermittent infusion devices, patient-controlled analgesia and epidural analgesia, complex wound care, gastrointestinal tubes, vascular access devices, enteral and parenteral nutrition, medication administration by IV push, urethral catheterization, blood glucose monitoring, administration of blood products, chest drainage systems, tracheostomy care and neurological assessment. Emphasis is placed on: student understanding regarding the purpose of the skill, focused assessment related to the skill and safe and confident demonstration of the skill. The communication and research aspects of the skills are also included. Independent and laboratory practice, demonstrations and examinations are part of the course.

■ Detailed Course Description

This course facilitates student learning of particular hands-on nursing skills used in professional nursing practice.

■ Evaluation

Midterm multiple choice exam	50%
Final multiple choice exam	50%
TOTAL	100%

Comments: To successfully complete this course, the student must:

1. participate in weekly practice labs.
2. achieve a final mark of 50%.

■ Course Learning Outcomes/Competencies

The student will:

1. describe the purpose of skill to the patient.
2. describe the safety principles for all nursing skills.
3. prepare a focused assessment of the patient related to the skill.
4. demonstrate selected skills competently and confidently while maintaining patient comfort.
5. demonstrate the communication aspects of nursing skills.
6. demonstrate responsibility for attaining and maintaining a safe level of skill performance.
7. plan patient teaching related to the skill.
8. think and reflect about nursing skills by:
 - 8.1 demonstrating awareness of the research base associated with the skills.
 - 8.2 recognizing the potential risks associated with the skills.
 - 8.3 making judgements about the skill considering the context.

■ Process Learning Threads

This course facilitates student growth in relation to these graduate outcomes:

- **Professionalism** — Students recognize the necessity to use sound assessment and clinical judgement in relation to skill performance. Students carry out skills safely while considering contextual and individual needs. They adhere to the standards for nursing practice in BC.
- **Communication** — Students use relevant and appropriate vocabulary when communicating about skills (verbally, in writing, and when using electronic charting). Students dialogue with colleagues and instructors in the process of learning
- **Systematic Inquiry** — Students have an increased awareness of relevant research related to skill performance. They use a variety of sources to understand what evidence supports skill protocols. They discuss evidence-based practice with health care professionals. Students raise questions about clinical techniques.
- **Professional Growth** — Students have individual responsibility in how skills are learned, practiced and demonstrated. Students value continually updating knowledge to practice safely. Students are responsible and accountable for their actions.
- **Creative Leadership** — Students collaborate with other health professionals about skills. Students recognize the need to make decisions about skills. Students recognize the need to make decisions about skill performance in individual patient situations. Students recognize potential risks to the patient and carry out the skills in a manner that would not increase the risk to patients.
- **Technical Skills** — Laboratory class and practice assists the students to develop competency with the skills used in nursing practice.

■ Verification

I verify that the content of this course outline is current.

Authoring Instructor

Date

I verify that this course outline has been reviewed.

Program Head/Chief Instructor

Date

I verify that this course outline complies with BCIT policy.

Dean/Associate Dean

Date

Note: Should changes be required to the content of this course outline, students will be given reasonable notice.

■ Instructor(s)

Cathy Hine

Office Location: SE12-418

Office Hrs.: By appointment

Office Phone: 604-432-8907

E-mail Address: catherine_hine@bcit.ca

■ Learning Resources

Required Textbook:

Perry, A.G., & Potter, P.A. (2002). *Clinical nursing skills and techniques* (5th ed.). St. Louis, MO: Mosby, Inc.

BCIT. (2002). *Clinical techniques 3: Laboratory manual*. Burnaby: Author.

One of the following medical-surgical textbooks:

Black, J.M., & Metassarin-Jabos, E. (1997). *Medical-surgical nursing: Clinical management for continuity of care* (5th ed.). Philadelphia, PA: Saunders.

LeMone, P., & Burke, L.M. (1996). *Medical-surgical nursing: Critical thinking in client care*. Menlo Park, CA: Addison Wesley.

Phipps, W.J., Sands, J.K., & Marck, J.F. (1999). *Medical-surgical nursing: Concepts and clinical practice* (6th ed.). St. Louis, MO: Mosby.

Smeltzer, S.C., & Bare, B.C. (1996) *Brunner and Suddarth's textbook of medical-surgical nursing* (8th ed.). Philadelphia, PA: Lippincott.

Required Readings: — See course schedule and reading list.

■ Information for Students

Assignments: Late assignments, lab reports or projects will **not** be accepted for marking. Assignments must be done on an individual basis unless otherwise specified by the instructor.

Makeup Tests, Exams or Quizzes: There will be **no** makeup tests, exams or quizzes. If you miss a test, exam or quiz, you will receive zero marks. Exceptions may be made for **documented** medical reasons or extenuating circumstances. In such a case, it is the responsibility of the student to inform the instructor **immediately**.

Ethics: BCIT assumes that all students attending the Institute will follow a high standard of ethics. Incidents of cheating or plagiarism may, therefore, result in a grade of zero for the assignment, quiz, test, exam or project for all parties involved and/or expulsion from the course.

Attendance: The attendance policy as outlined in the current BCIT Calendar will be enforced. Attendance will be taken at the beginning of each session. Students not present at that time will be recorded as absent. Students may be recommended for an unsatisfactory grade if absent more than 10% of the time. Students are responsible for content and practice activities for a missed class.

Illness: A doctor's note is required for any illness causing you to miss assignments, quizzes, tests, projects or exam. At the discretion of the instructor, you may complete the work missed or have the work prorated.

Attempts: Students must successfully complete a course within a maximum of three attempts at the course. Students with two attempts in a single course will be allowed to repeat the course only upon special written permission from the Associate Dean. Students who have not successfully completed a course within three attempts will not be eligible to graduate from the appropriate program.

Course Outline Changes: The material or schedule specified in this course outline may be changed by the instructor. If changes are required, they will be announced in class.

■ **Information for Students (cont'd.)**

1. Course delivery and evaluation methods will be discussed during the first week of the class.
2. Clinical techniques will be practiced during laboratory periods and open lab practice times.
3. Unforeseeable circumstances may necessitate the alteration of course content, sequencing, timing or evaluation. As much as possible, students will be given adequate notice of such changes.

■ **Assignment Details**

1. **Midterm Multiple Choice Exam** *Midterm exam is worth 50% of total final grade.*

The multiple choice exam will be based on the clinical techniques covered in weeks 1–8.

2. **Final Multiple Choice Exam** *Final exam is worth 50% of total final grade.*

A multiple choice exam will be given during examination week. The questions will be based on the skills from midterm to the end of the term.
