NURS 3034 is a Prerequisite for:**Course No. Course Name**

NURS 4030 Nursing Practicum 4

NURS 3034 is a Corequisite for:

NURS 3032 Family Nursing Theory

■ Course Description

In this course, students will gain nursing experience in perinatal nursing and nursing of families with a hospitalized child. Emphasis will be placed on nursing care of hospitalized clients within the context of their families. Students will begin to assess and include the family in nursing interventions. Students are expected to provide knowledgeable and safe nursing care to stable clients/families. With consultation and assistance, students may provide nursing care to clients/families experiencing unstable health issues. The scope of nursing practice includes consideration of health promotion and illness prevention.

The course builds on the concepts discussed in NURS 3000 Applied Nursing Science 3 and NURS 3032 Family Nursing Theory courses.

■ Detailed Course Description

NURS 3034 is a practicum course that introduces students to the nursing care of childbearing families and families with a hospitalized child. In these settings, students will care for individuals and family members who are experiencing stable* health issues. Emphasis is placed on developing knowledge, skills, attitudes, and judgments relevant to the provision of holistic care to clients within the context of the family.

■ Evaluation

- Satisfactory/Unsatisfactory standing based on student and instructor evaluation of course outcomes.
- Journal — satisfactory/unsatisfactory reflective journal according to Clinical Journal Guidelines.
- All assignments must be completed to achieve a passing grade.

* Stable — For the purpose of this course 'stable' refers to client health situations in which the "client's health status can be anticipated, the plan of care readily established, and is managed by interventions that have predictable outcomes (Canadian Nurses Association, 1999 cited in RNABC (2000). *Competencies required of a new graduate*.

■ Course Learning Outcomes/Competencies

All professional nurses in the province of British Columbia must do a yearly practice self-evaluation, plan remedial activities, and evaluate the activities as a requirement for continued nurse registration. The *Standards for Nursing Practice in British Columbia* (RNABC, 2003) is used as the basis of the course outcomes. The *Standards for Nursing Practice in British Columbia* (RNABC) has been used to organize and supplement the course outcomes in this document. The course outcomes are organized by the standards (1–6) with the specific NURS 3034 sub-outcomes following the standards.

Standard #1: Responsibility and Accountability

Maintains standards of nursing practice and professional conduct determined by RNABC and the practice setting.

Course Outcomes

- *Provides professional caring which is based on knowledge and skills.*
- *Monitors and reflects on own practice.*
- *Implements technical skills competently with increasing confidence.*

Clinical Practice Indicators

- 1.1 Follows BCIT and practicum agency policies and procedures.
- 1.2 Demonstrates responsibility for own learning and actions.
- 1.3 Demonstrates accountability for attaining and maintaining a safe and ethical level of nursing practice.
- 1.4 Consistently arrives to family practicum experiences on time.
- 1.5 Consistently hands in all family practicum assignments on time.

Standard #2: Specialized Body of Knowledge

Bases practice on the best evidence from nursing science and other sciences and humanities.

Course Outcomes

- *Provides professional caring which is based on knowledge and skills.*
- *Pursues shared meaning by communicating effectively with individuals within the context of their family.*

Clinical Practice Indicators

- 2.1 Prepares (researches) for all assigned patients during the family practicum experiences.
 - 2.1.1 Discusses diagnosis, related physiology, and pathophysiology.
 - 2.1.2 Anticipates potential problems and nursing care.
- 2.2 Uses evidence-based knowledge from nursing health sciences and related disciplines to provide safe, individualized nursing care within the context of the family.

- 2.3 Establishes partnerships with patients, family, instructor, peers, and health care team.
- 2.3.1 Builds on interpersonal communication theory to effectively use listening, interviewing, and clarification skills.

Standard #3: Competent Application of Knowledge

Makes decisions about actual or potential problems and strengths, plans and performs interventions, and evaluates outcomes.

Course Outcomes

- *Provides professional caring which is based on knowledge and skills.*
- *Pursues shared meaning by communicating effectively with individuals in the context of their family.*
- *Uses creative leadership skills to manage stable individuals within the context of their family.*
- *Implements technical skills competently with increasing confidence.*

Clinical Practice Indicators

- 3.1 Performs focused, thorough, and ongoing assessments of the patient within the context of their family.
- 3.1.1 Applies specialty (childbearing, child rearing and family theory), as well as previously learned knowledge and experience.
- 3.1.2 Begins to assess how the patient will cope at home.
- 3.2 Engages in helping interactions with patient and family.
- 3.2.1 Involves patient and family (when appropriate) in planning care.
- 3.3 Organizes care based on priorities.
- 3.4 Implements technical skills competently.
- 3.4.1 Anticipates, prepares, and organizes for skill performance.
- 3.4.2 Practices asepsis.
- 3.4.3 Observes patient comfort and safety during skills.
- 3.4.4 Communicates appropriately with the patient and family during skills.
- 3.4.5 Teaches the patient and family about the skill when applicable.
- 3.4.6 Reports and records skills and interprets observations.
- 3.5 Recognizes and communicates problems promptly.
- 3.5.1 Reports patient care and progress to appropriate team member in a timely fashion.
- 3.6 Follows charting guidelines used in the assigned hospital setting.
- 3.6.1 Charting is clear, concise, relevant, and timely.
- 3.7 Plans, implements, and evaluates patient and family teaching (when appropriate).
- 3.8 Attempts to understand situations from a variety of viewpoints.
- 3.9. Uses appropriate resources.
- 3.10. Demonstrates confidence at the bedside.

3.11. Shows initiative in the planning and implementation of patient care.

3.12. Demonstrates assertiveness.

Standard #4: Code of Ethics

Adheres to the ethical standards of the nursing profession.

Course Outcomes

- *Provides professional caring which is based on knowledge and skills.*
- *Pursues shared meaning by communicating effectively with individuals within the context of their family.*

Clinical Practice Indicators

4.1 Upholds the values contained in the Canadian Nurses Association (CAN) Code of Ethics for Registered Nurses, namely:

- Safe, competent, and ethical care
- Health and well-being
- Choice
- Dignity
- Confidentiality
- Justice
- Accountability
- Quality practice environments

4.2 Demonstrates respect for patients, families, co-workers, students, and instructor.

4.2.1 Is non-judgmental, respectful, and willing to see things from another's viewpoint (patient, family, staff, and peers.)

4.3 Maintains strict confidentiality of patient and family information.

4.3.1 Maintains confidentiality when discussing other nursing practices.

Standard #5: Provision of Service to the Public

Provides nursing services and collaborates with other members of the health care team in providing health care service.

Course Outcomes

- *Pursues shared meaning by communicating effectively with individuals within the context of their family.*
- *Develops collaborative partnerships with members of the health care team.*

Clinical Practice Indicators

5.1 Communicates, collaborates, and consults with other members of the health care team about the patient's care.

- 5.2 Develops collaborative, professional, and respectful relationships with peers, instructor, and other members of the health team.
 - 5.2.1 Develops and participates in a learning partnership with instructor.
 - 5.2.2 Introduces self to team members at beginning of each shift and identifies responsibilities and limitations.
 - 5.2.3 Reports relevant data to RN and instructor in a timely fashion.
 - 5.2.4 Establishes an effective rapport with RN(s).
- 5.3 Begins to consider issues related to patient advocacy.

Standard #6: Self-Regulation

Assumes primary responsibility for maintaining competence and fitness to practice.

Course Outcomes

- *Monitor and reflect on own practice. Determine learning needs and independently act upon identified learning needs.*

Clinical Practice Indicators

- 6.1 Maintains current RNABC student membership and CPR Level C.
- 6.2 Submits a minimum of four reflective journals.
- 6.3 Practices within own level of competence.
 - 6.3.1 Self-evaluates.
 - 6.3.2 Recognizes own limitations and seeks help from appropriate resources.
 - 6.3.3 Recognizes when own limitations contribute to unsafe implementation of nursing care and takes action to prevent errors.
 - 6.3.4 Requests assistance when own abilities are exceeded.
 - 6.3.5 Celebrates personal and professional growth.
- 6.4 Open to feedback.
- 6.5 Writes a learning plan.
 - 6.5.1 Identifies own learning needs.
 - 6.5.2 Sets goals and plans strategies for action.
- 6.6 Maintains own physical, psychological, and emotional fitness to practice.
- 6.7 Seeks learning opportunities to develop clinical competencies.

■ **Learning Process Threads**

Professionalism: Students further develop an understanding of the professional nurse's role. They begin the process of assessing and intervening with individuals and families. They begin to analyze data and develop care plans. They pursue shared meaning with individual's families to establish partnerships. They understand healthy development in families, and nurse to support and facilitate this process. They begin to consider the impact of health and illness on the family, and the influence of family interactions on health and illness. They understand

nursing in the context of family. They evaluate their care and incorporate a code of ethics consistent with professional practice.

Communication: Students dialogue with colleagues and teachers in the process of learning. With increasing independence, students establish relationships with individuals based on shared meaning and incorporate this into their assessments. They utilize effective communication skills and evaluate the impact of these interactions on the family. With assistance, students document and report patient assessments and nursing care. Students teach using the principles of teaching and learning.

Systematic Inquiry: Students are increasingly independent with critical thinking and use a variety of sources of knowing to guide care. They reflect on their competencies related to nursing knowledge, skills, attitudes, and judgment. Students anticipate alternate perspectives of nursing practice and explore their relevance and relationship to care.

Professional Growth: Students take responsibility for their learning. They consult or interact with a variety of health professionals. They reflect on their experiences. They recognize their limitations and seek assistance. They value discussions of their performance and self-evaluate and act on their learning needs. They share knowledge and experiences with colleagues and take responsibility for the debriefing sessions. They demonstrate responsibility for attaining and maintaining a safe level of skill performance. Also, they are responsible and accountable for their actions and are becoming committed to professional growth.

Creative Leadership: Students appreciate the role of nurses in the health care system and understand the various components in this context of practice. They work to establish collaborative partnerships with colleagues. Self-direction and dialogue are essential to partnerships. With assistance, students develop increased confidence, assertiveness, and initiative in the provision of nursing care. Students manage changing patient situations with assistance. They gain knowledge of and are actively involved in the continuum of care for specific patients. They participate in and support appropriate referrals for continuing and/or alternate care. Therefore, they are beginning to understand nursing leadership within this context of practice.

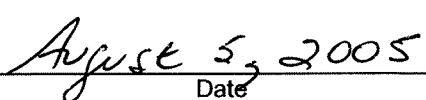

Technical Skills: Students are safe with technical skills and with assistance, show increasing confidence in their ability to modify skills to fit the context of practice. They review agency policy regarding skills.

■ **Verification**

I verify that the content of this course outline is current.

Authoring Instructor

Date

I verify that this course outline has been reviewed.

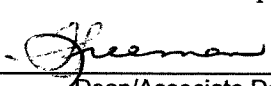

Program Head/Chief Instructor

Date

I verify that this course outline complies with BCIT policy.

Dean/Associate Dean

Date

Note: Should changes be required to the content of this course outline, students will be given reasonable notice.

■ Instructors

Diane Belyk (course leader)	Office No.: SE12-418	Office Phone: 604-432-8910
Karen Driol	SE12-418	604-451-6946
Ling Lai	SE12-418	604-454-2212
Rachel Watkins	SE12-418	604-454-2210

■ Learning Resources

Required:

Course-specific:

- Wong, D.L., Perry, S.E., & Hockenberry, M.J. (2002). *Maternal child nursing care* (2nd ed.). Toronto, ON: Mosby.
- BCIT Nursing Program. (2004). *Student guidelines, policies and procedures*. www.bcit.ca/files/health/nursing/pdf/studentpolicies040304.pdf

Generic texts: required

Code of Ethics
Standards for Nursing Practice
Fundamentals of Nursing
Laboratory and Diagnostic Handbook

Equipment:

- A uniform that complies with program policies (refer to *BCIT Nursing Program Guidelines Policies and Procedures*). The practicum instructors will inform you about uniform standards in specific agencies.
- White shoes that comply with program policies.
- Stethoscope.
- Black and red ballpoint pens and notebook.
- Bandage scissors.
- Digital watch or pocket watch with a second hand.

■ Information for Students

Illness: A doctor's note is required for any illness causing you to miss assignments, quizzes, tests, projects, or exams. For a prolonged illness of three or more consecutive days, the student must submit a Medical Certificate to the Program Head, Jim Hunter (see Guideline C-2 6.2).

■ Student Evaluation

Regular dialogue between instructor and student serves to promote learning and achievement of the course outcomes. Towards the end of the course the student must show evidence that the course outcomes are being met. The student and teacher will meet to draft the final summary of outcome achievement. **All reflective journals must be completed to achieve a satisfactory standing in this course. The reflective journal must show**

sufficient thoroughness and thought in order to be accepted. The instructor ultimately has the responsibility to recommend a Satisfactory or Unsatisfactory standing in this course.

■ Course Evaluation

Students have the right and the responsibility to evaluate this course. Dialogue with the instructor will assure that the course outcomes will be facilitated as the student moves from one clinical setting to another. An end-of-term review is aimed at modifying the course for subsequent students.

■ Attendance

Attendance is required in this course as this practical experience is essential to meet program outcomes and to learn how to practice nursing. BCIT Attendance Policy applies (see Guidelines for Students in Nursing Program). Practicum hours may include days and evenings.

It is expected that students will be in satisfactory health when providing nursing care for people. If students are not able to attend a practicum experience, the instructor and agency must be informed before the experience begins for the day.

■ Participation

1. Students will be given patient information the day prior to the pediatric practicum experience if possible. Patient information will be provided just prior to the maternity practicum experience. Research is required before practicum so that students have a reasonable understanding of the reason for hospitalization, type of treatments and interventions, and an understanding of what nursing care the patient(s) might require.
2. Safe nursing care is required. The instructor has the responsibility to assist students to provide safe and comfortable care for the patient. Students are expected to take responsibility for errors and to document them according to agency and BCIT policy. Students whose care is unsafe regardless of instructor input and supervision may be removed from the practicum setting. (See *BCIT Nursing Program Guidelines Policies and Procedures*.)
3. Students can expect to attend a weekly practicum-debriefing meeting. Students and the instructor have a joint responsibility to see that these debriefings are meaningful. They will decide when the debriefings will be scheduled each week and how the debriefing will be structured. A one-hour a week debriefing is suggested.

■ Clinical Journal Guidelines

1. Submit journals on Friday by 1230 hr to the instructor's mailbox in SE12-418 or by e-mail. *(See practicum map for due dates.)
2. Journals are to be done in a duo-tang or small notebook (8½ × 11) or using the electronic template.
3. Please leave a 2" margin on the right side of the page for instructor comments.
4. The journal requirement needs to achieve a satisfactory level in order to be successful in Nursing of Families Practicum — Level 3. Instructor feedback will be provided to assist you in your journaling. Guidelines regarding journal expectations are outlined below.

5. Do not use patient or staff names in your journal, just initials.

* Submission of assignments by e-mail may be required at instructor's discretion.

The goal of reflective journaling is to provide you with an opportunity for reflection and critical analysis of **your weekly clinical experiences**. The ongoing dialogue with your instructor is intended to enhance your professional growth as you become more critically aware of your learning experiences.

Emphasis is placed on the quality, not the quantity of your journal entries. The length of your entry may vary from week to week. Instructor comments and feedback will be provided as required. Ensure that you include the three sections of the journal as outlined below:

1. Describe in detail an event, which occurred during the clinical week that you have deemed to be significant in **promoting a greater understanding of nursing care**. You may have been a participant or an observer during this event. Rather than focus on deficiencies in practice for your journal, you should gain insights on positive practice. As Heath notes, "reflective practice should also be used to identify why a situation went well as this will identify knowledge embedded in practice" (1997, p. 1059). Your response should be approximately one page in length — single-spaced.
2. Discuss your interpretation of the event(s). To assist you with this, you may wish to refer to Carper's four patterns of knowing (Heath, 1998, p. 1054). Cue questions from John's model of guided reflection (Grech, 2004) are noted below to assist you to apply Carper's patterns of knowing to your learning experiences.

Personal Knowing — Personal knowing encompasses the inner experience of becoming whole and is gained from reporting on a situation in which you were directly involved as a participant or indirectly involved as an observer. Reflective processes include opening, centering, and realizing. The goal is to consciously reflect on your behavior/observations by asking yourself questions such as "how did I feel in this situation? or what internal factors were influencing me?"

Empirical Knowing — Empirical knowing involves answering questions by drawing conclusions from systematic inquiry of empirical data. Processes used include describing, explaining, and predicting. Ask yourself "what knowledge did or should have informed me?"

Ethical Knowing — Ethical knowing arises from one's consideration of what is right or good in a situation from a moral perspective. Ethical knowing involves knowing the basis for difficult decision making and knowledge of ethical principles and codes. Reflective processes used include valuing, clarifying one's own beliefs, and advocating. Ask yourself "how did my actions match with my beliefs? and how do specific ethical principles or codes relate to this event?"

Aesthetics or The Art of Nursing — In developing knowledge and understanding related to the art of nursing, the students will assign meaning to a situation or observation and envision new or creative ways of thinking and responding in clinical practice. Reflective processes used include engaging, interpreting, and envisioning. Ask yourself these questions "What was I trying to achieve? What were the consequences for the client, others and myself? How was the person(s) feeling? How do I know this?"

3. Identify what learning has occurred and what insight you have gained by this experience. John's (Grech, 2004) process of reflexivity suggests further questions to frame your learning. These include: How did this connect with previous experiences? How do I now feel about this situation? Has this changed my ways of knowing? Can I support myself and others better as a consequence? (See Thorpe (2004) for examples of reflectors and non-reflectors.)

Literature used to support your analysis must be referenced per APA format.

■ Learning Plan Guidelines

1. Submit updated learning plan on Friday by 1230 to your instructor's mailbox in SE12-418 or by e-mail.
(See practicum map for due dates.)
2. Review the course outcomes and write a personalized learning plan to reflect all course outcomes and to guide your learning during the family practicum.
3. Update and revise your learning plan as required for midterm and final evaluations.
4. Revise learning plan as directed by your instructor or when new learning needs arise.
5. Please make an appointment to see your instructor if you require assistance or more feedback at any time during the practicum experience.

Please note that a learning plan is your guide to successful achievement of course outcomes. Each new practicum course brings with it many new learning needs and opportunities. Your learning plan should reflect the context of the practicum area and should also include any continuing learning needs from previous practicums.
