COURSE DESCRIPTION

This course is offered in the third term of the General Nursing Program.

NURS 3102 is a clinical practice course which focuses on the nursing measures required to assist children and childbearing individuals to satisfy needs. Knowledge and skills from NURS 3101 - Nursing Level 3 Theory are applied.

Clinical experience is provided on family-centered maternity and general pediatric units. Students are expected to provide care to 2-3 pediatric patients and a maximum of 4 maternity patients and their neonates. Some experience is provided in the labor and delivery unit. Some experience may be provided in appropriate outpatient or day clinics as well.

JUN 16 1993

APPROVED:

COURSE OBJECTIVES

The student:

1. Uses the nursing process to assist individuals to satisfy needs when there are appropriate and/or inappropriate responses to stressors.
2. Performs nursing psychomotor skills with a degree of skill that ensures safety and promotes comfort.
3. Demonstrates caring behaviors toward patients and involved family member(s).
4. Uses selected interactive skills to initiate, maintain and terminate a helping relationship with patients and involved family member(s).
5. Demonstrates organizational ability in providing nursing care.
6. Implements teaching plans for individuals and involved family member(s).
7. Participates actively in selected groups and/or with individuals.
8. Demonstrates responsibility and accountability for actions as a nursing student.
9. With assistance, works collaboratively with health care workers.

EVALUATION

Clinical Assignments	Satisfactory/Unsatisfactory
-------------------------	-----------------------------

REQUIRED TEXT(S) AND EQUIPMENT

Ladewig, P., London, M. & Olds, S. (latest edition). Essentials of maternal-newborn nursing. Menlo Park, California: Addison Wesley.

Whaley, L., & Wong, D. (latest edition). Essentials of pediatric nursing. St. Louis: Mosby.

Students are advised that all texts from previous courses may be needed.

LEARNING EXPERIENCES

CLASSROOM EXPERIENCES

TEACHING/LEARNING
APPROACHES

IMPLEMENTATION

Hospital

Focuses on individuals who require assistance to satisfy needs.

- experience on:
 - pediatric units
 - family-centered childbearing units
- patient assignments by instructor
- application of nursing core, nursing skill and professional behavior
- assignments - written nursing process

Post-clinical conference

- discussion of aspects of nursing care with which the student is involved
- integration of theory with clinical practice
- student presentations
- preparatory reading and assignments

- 8 students per instructor for 13 hours per week for 8 weeks of Pediatrics and 8 weeks of Childbearing

- 8 students per instructor for 2 hours per week for 16 weeks

- to be held at BCIT

B. INTERVENTION

1. Planning

- a. Sets short and long-term goals according to criteria.
- * b. Plans nursing measures which:
 - i. support appropriate responses
 - ii. encourage development of appropriate responses
 - iii. alter inappropriate responses
 - iv. remove stressors, if possible
- * c. Makes judgments based on knowledge.
- * d. Explains rationale for nursing measures and nursing judgment.

2. Implementation

- a. Implements independent nursing measures.
- * b. Implements dependent nursing measures.
- * c. Explains rationale for nursing measures and nursing judgments.

C. EVALUATION

- * 1. Evaluates the outcome of independent and depending nursing measures.
- 2. Determines if goals have been met.
- 3. Modifies nursing measures with assistance.

II. NURSING PSYCHOMOTOR SKILLS

Performs selected nursing psychomotor skills with a degree of skill that ensures safety and promotes comfort.

- * 1. Explains the purpose of the skill.
- 2. Uses appropriate sources to review the skill before performing it.
- * 3. Familiarizes self with equipment, policies and procedures in the assigned clinical agency.
- 4. Collects required equipment before performing the skill.
- 5. Organizes the work environment to facilitate performance of the skill.
- 6. Teaches the patient about the skill.
- * 7. Uses measures to ensure patient and own safety.
- 8. Implements measures which ensure patient comfort.
- * 9. Demonstrates a correct method of performing the skill.
- 10. Adapts the skill to patient situations.
- *11. Makes observations before, during and after the skill.

IV. INTERACTIVE SKILLS

Demonstrates selected interactive skills to initiate, maintain and terminate a helping relationship with patients and involved family member(s).

- *1. Describes the goal of the helping relationship.
- *2. Demonstrates behaviors that promote a helping relationship:
 - a. respect
 - b. genuineness
- *3. Initiates a helping relationship by demonstrating:
 - a. attending
 - b. listening
 - c. empathy
4. Maintains a helping relationship by demonstrating:
 - * a. attending
 - * b. listening
 - * c. empathy
 - d. summarization with assistance
 - e. information sharing with assistance
 - f. self-sharing with assistance
5. Terminates a helping relationship by:
 - a. sharing feelings related to termination with the patient and involved family member(s)
 - b. giving recognition to problem solving accomplished by patient and involved family member(s)
6. Demonstrates interviewing techniques for specific situations and/or selected nursing procedures with patients and involved family member(s).
7. Identifies factors that affect any phase of the helping relationship and data collection.
8. Modifies, with assistance, own interactive skills in response to factors that affect any phase of the helping relationship and data collections.

VI. PATIENT TEACHING

Implements teaching plans for individuals and involved family member(s).

- * 1. Identifies learning needs.
- 2. Assesses readiness to learn.
- 3. Makes use of all teaching opportunities.
- 4. Implements the teaching plan:
 - a. Adapts teaching methods of the individual and involved family member.
 - b. Provides anticipatory guidance.
- 5. Evaluates the learning outcomes.
- 6. Modifies the teaching as required.

IX. WORKING AS A HEALTH CARE WORKER

With assistance, works collaboratively with health care workers.

1. Communicates with health care workers about patients.
 - * a. Reports relevant data:
 - i. to appropriate personnel
 - ii. at appropriate times
 - iii. in appropriate places
 - * b. Records relevant data:
 - i. at appropriate times
 - ii. on correct documents
 - iii. according to legal requirements
 - c. Listens to change of shift report.
 - * d. Contributes data for change of shift report.
 - e. Modifies Kardex care plan with assistance.
 - f. Participates in patient care conference as available.
 - g. Makes referrals with assistance.
2. Facilitates effective working relationships:
 - * a. Demonstrates respect for co-workers.
 - b. Shares experiences and knowledge with others.
 - c. Helps others when appropriate.
3. Participates in ward routine and tasks.
