Course Outline

A POLYTECHNIC INSTITUTION

School of Health Sciences

Program: Bachelor of Technology in Nursing

Option:

NURS 7030
Nursing Practicum 5**Start Date:** October 13, 2003**End Date:** December 12, 2003**Total Hours:** 320 **Total Weeks:** 8**Term/Level:** 5 **Course Credits:** 13**Hours/Week:** 40 **Lecture:** **Lab:****Seminar:** 40 (Clinical Agency Practicum)**Prerequisites****Course No. Course Name**

NURS 1060 Pharmacology

NURS 2040 Professional Practice 2

NURS 4000 Nursing and Health Issues

NURS 4030 Nursing Practicum 4

NURS 3020 Clinical Techniques 3

Current CPR (two person)

Current RNABC Student Membership

NURS 7030 is a Prerequisite for:**Course No. Course Name**NURS 7130 Nursing Practicum 6: Community
Continuing Care

NURS 8800 Community Health

■ Course Description

This practicum course will occur in a variety of institutions throughout the Lower Mainland and in a variety of units within those institutions. The units may be specialized in focus. Placements are also provided at the Cranbrook Hospital for COTR students. Working in collaboration with a RN, preceptorship students are expected to manage the clinical aspects of planning, implementing and evaluating nursing care for a group of patients within the RN's (preceptor's) workload.

■ Detailed Course Description

NURS 7030 is a practicum course focusing on providing nursing care for patients experiencing a variety of health problems that require hospitalization. Students integrate relevant knowledge, skills and attitudes to assume responsibilities of a beginning practitioner in relation to the coordination and management of nursing care for a group of patients.

■ Evaluation

- Satisfactory/unsatisfactory standing based on Student, Preceptor and Instructor evaluation of course outcomes.
- Satisfactory completion of self-evaluation notes.

■ Course Learning Outcomes/Competencies

This practicum experience occurs within acute medical and surgical nursing units with individuals who are experiencing complex, acute health problems with the potential for rapidly changing and/or emergency nursing needs. Considering family needs and interacting with patients' families is required.

In this context, the student will:

1. implement professional caring based on integrated knowledge and skill.
2. pursue shared meaning by facilitating communication with people.
3. integrate systematic inquiry into practice by:
 - analyzing client issues for unique aspects and responding with appropriate clinical judgements.
 - thinking critically and reflecting while practicing.
4. monitor and evaluate own clinical nursing practice and act to modify it.
5. assume responsibility for own learning needs and value learning as a way of anticipating future work requirements.
6. work collaboratively with members of the health care team in providing appropriate care for a group of patients.
7. demonstrate assertiveness and organizational skills.
8. implement technical skills with dexterity.

*Please review practicum evaluation form for specific indicators for each learning outcome.

■ Process Learning Threads: NURS 7030

Professionalism

Students are increasingly independent with analysis of assessments, care planning, care implementation and evaluation. They encourage client decision making and integrate this into the plan of care. They collaborate with health professionals to provide holistic care to clients. They defend the client's right to be informed. They begin to consider health promotion as an integral aspect of care. Students take the full RN patient load and assign back a maximum 25% of the workload to the RN and/or LPN.

Communication

Students use positive, pro-client caring attitudes and skills to establish partnerships with clients. The shared meaning they achieve is used to solidify their partnership and individualize the plan of care. Students record and report pertinent patient assessments and nursing care in a timely manner. Students use effective communication strategies to build partnerships with health care consumers and co-workers. Students dialogue with instructor, preceptor and other health care workers in the process of learning. They use principles of teaching and learning. Students discuss issues thoughtfully, verbally and in writing.

Systematic Inquiry

Students use evidence-based research. They start to critically think and reflect while nursing rather than only after the fact. Students analyze client issues for unique aspects and respond with appropriate clinical judgments. Students raise questions about nursing practices to analyze alternatives. Students reflect on and analyze their values, beliefs and assumptions regarding health and partnership.

■ **Process Learning Threads: NURS 7030 (cont'd.)**

Professional Growth

Students value learning as a way of promoting professional growth. They assume responsibility for continued knowledge development. They constantly evaluate their care using professional nursing standards and modify their practice to accommodate new learning. Students are responsible for attaining and maintaining a safe level of skill performance. Students continue to develop reflective skepticism. They are responsible and accountable for their actions and write self-evaluation notes that demonstrate progress in achieving course outcomes.

Creative Leadership

Students maintain ongoing communication with colleagues and work to encourage partnerships with them. Students perform effectively in teams including negotiation and assignment of duties and tasks to other RNs or LPNs. They demonstrate assertiveness. Students are learning to manage a group of clients by becoming more organized, efficient and quicker in giving care. They are beginning to anticipate the work that will be required throughout the day and set priorities to achieve this. They anticipate the continuum of care required for specific patients. In collaboration with nurses, students take an active role in assessment of discharge needs and discharge planning. They further develop their understanding of nursing leadership within the acute care context of practice.

Technical Skills

Students are developing precision in the implementation of clinical technical skills. They implement a logical sequence of actions, they are coordinated and they give safe care. They need supervision with skills they have not previously mastered. As the course progresses, the time and speed are within reasonable limits so the beginning level of articulation is developing. Students review and work within agency and BCIT policies regarding skills.

■ **Verification**

I verify that the content of this course outline is current.

Authoring Instructor

Date

I verify that this course outline has been reviewed.

Program Head/Chief Instructor

Date

I verify that this course outline complies with BCIT policy.

Dean/Associate Dean

Date

Note: Should changes be required to the content of this course outline, students will be given reasonable notice.

■ Instructor(s)

Anne Houseman	Office Location: SE12-418 Rm 437	Office Phone: 604-432-8686 E-mail Address: anne_houseman@bcit.ca
Ann Kenny-Lee	Office Location: SE12-418 Rm 438	Office Phone: 604-432-8791 E-mail Address: ann_kenny-lee@bcit.ca
Denise Beaupre	Office Location: SE12-418	Office Phone: 604-432-8913 E-mail Address: denise_beaupre@bcit.ca
Pauline Zabawski	Office Location: SE12-418	Office Phone: 604-451-6957 E-mail Address: pauline_zabawski@bcit.ca
Cheryl Segaric	Office Location: SE12-418	Office Phone: 604-431-4975 E-mail Address: cheryl_segaric@bcit.ca
Selma Whiteside	Office Location: SE12-418	Office Phone: 604-451-6953 E-mail Address: selma_whiteside@bcit.ca

■ Learning Resources

Required:

- Previously required textbooks will be useful resources during this practicum experience.
- BCIT Student Guidelines, Policies and Procedures in the Nursing Program.* on-line access available; <http://www.health.bcit.ca/nursing/>
- Registered Nurses Association of British Columbia (latest). Standards for Nursing Practice in British Columbia, Vancouver, BC.

* You will need to refer to this when you are on the wards.

Recommended:

- a uniform that complies with program policies
- shoes that comply with program policies
- a stethoscope
- a black ink pen
- a pen light
- bandage scissors
- a watch with a second hand
- a lock may be required if you use a hospital locker to store coats, etc. while at the hospital

■ Information for Students

Assignments: Late assignments will **not** be accepted for marking unless the late due date has been negotiated with the instructor.

Ethics: BCIT assumes that all students attending the Institute will follow a high standard of ethics. Incidents of cheating or plagiarism may, therefore, result in a grade of zero for the assignment, quiz, test, exam or project for all parties involved and/or expulsion from the course.

■ Information for Students (cont'd)

Student request for placement outside what is normally offered: One visit by a BCIT instructor will be made, and the student is financially responsible for the cost of that visit. These costs include transportation, meals and accommodation.

Attendance: The attendance policy as outlined in the current BCIT Calendar will be enforced. Attendance is required in this course as this practical experience is essential to meet program outcomes. BCIT Attendance Policy applies. If students take time off for personal reasons other than illness, they are expected to make up that time. A doctor's note is required for any extended illness. What is considered in the end is: "Did the student achieve the course outcomes?"

Illness: A doctor's note is required for any illness causing you to miss more than 10% of the practicum experience.

Course Outline Changes: The material or schedule specified in this course outline may be changed by the instructor. If changes are required, they will be announced in class.

■ Information Regarding this Practicum

1. Students are responsible for identifying their own learning needs and consulting with the preceptor and instructor to discuss how to meet these needs.
2. A learning partnership is essential for successful completion of this course. Student, preceptor and instructor will communicate openly, will demonstrate respect in the relationship and will work to establish and maintain collaborative relationships. This can be achieved by:
 - discussing the course outcomes to achieve shared understanding of them. The discussion should include what experiences are needed to support achievement of the outcomes.
 - identifying the evidence required to demonstrate achievement of the outcomes. The sub-outcomes give direction in this regard.
 - initiating regular dialogue throughout the practicum experience and promoting trust in the student/preceptor relationship, so the preceptor is satisfied and safe nursing care is provided by the student. Regular dialogue between instructor and student serves to promote learning.
3. **In the event of an unusual incident by a preceptorship student, the student must notify the appropriate BCIT instructor within 24 hours. The student may need to fill out a hospital incident report at the time of the incident. A Nursing Program Incident Report is also completed by the student, given to the preceptor for comment and then mailed or faxed to the BCIT instructor.**

■ Student Evaluation

The student must show evidence that the course outcomes are being met. Student are expected to maintain self-evaluation notes throughout the experience. The notes must show sufficient thoroughness and thought in order to be accepted. Students are expected to share their self-evaluation with the preceptor. The ongoing self-evaluation notes must be completed to achieve a satisfactory standing in this course.

The student completes the practicum evaluation form as provided. The preceptor may add information to the evaluation form. The instructor may add comments to the evaluation form and ultimately has the responsibility to recommend a Satisfactory or Unsatisfactory standing in this course.

■ Course Evaluation

Students are expected to initiate discussion with the instructor about any aspects of this course.

■ Participation

1. A Level 5 preceptorship student is expected to take responsibility for increasing his/her knowledge base. Students will work with a RN within the RN's assigned workload. Students will assume responsibility to research patient diagnosis, treatment and ordered medications. Students will use information available on the ward in order to function appropriately. This information includes policy and procedure manuals.
2. Safe nursing care is required. The preceptor will assist the student to gradually accept responsibility for the RN role. As students move along in this experience it is expected that they will work more independently but collaboratively. Students are expected to take responsibility for errors and to document them according to agency and BCIT policies.
3. A student who cannot make progress, is unable to work collaboratively with the preceptor and others, and whose care is viewed as inappropriate and/or unsafe will be removed from this course.
4. A Student Preceptorship Manual provides useful information related to this practicum experience and students are expected to use the manual. Preceptorship students are expected to refer to the **BCIT Student Guidelines, Policies and Procedures** document they received on entry into the program. These guidelines provide information related to medication administration that will assist you in the clinical area. Please review these policies before starting the practicum and take the document to clinical. Current edition of BCIT Student Guidelines, Policies and Procedures is available on-line at <http://www.health.bcit.ca/nursing/>

■ Written Requirements

A. Self-Evaluation Notes

Students will complete a written self-evaluation for each set of shifts. The self-evaluation is shared with the preceptor. Preceptors read and often add comments to the self-evaluation. The instructor reads the notes and will call the student to clarify, suggest, encourage and support the student in achieving the course outcomes.

Guidelines for Self-Evaluation Notes

1. You will receive a template that will give directions about how to complete these notes.
2. Mail, e-mail, fax or deliver your self-evaluation notes to your instructor immediately following the last shift of the set.

If mailing, the address is: Name of Instructor
 Instructor, Level 5
 Nursing Program
 British Columbia Institute of Technology
 3700 Willingdon Avenue
 Burnaby, BC V5G 3H2

If faxing, the number is 604-436-9590. Please include a cover sheet **including the name of sender and receiver.**

■ **Written Requirements (cont'd.)**

3. Share your self-evaluation with your preceptor so that she/he has the opportunity to add comments and to sign the notes. This might be an excellent time to discuss new learning needs and to formulate a plan to meet these needs. **Then forward the page with your preceptor's comments to your instructor.**
